## Welcome to our first monthly newsletter from "Travel with NARPO".

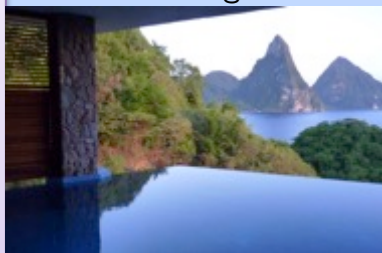

The feedback since taking over from Roger has been really appreciated and I am pleased to have been able to help so many members, not only with bookings but with advice and suggestions

Regardless of just thinking about a holiday, or even your first cruise, just call for a chat. I have worldwide travel experience and appreciate plans and ideas change continually until you decide to make a booking. Often going back in to your local travel agent can become awkward as you alter the ideas, well that is no longer an issue !

You are fully protected and our ABTA No is K9413 but we are also a division of HAYS TRAVEL , the UKs largest independent travel agent. So you know you are in safe hands and we have excellent buying power to give you the best deals. I'm based in Tyneside and have an office in Monkseaton , where anyone is welcome to make an appointment to pop in for a coffee. But I work for clients nationwide and do not have set 9-5 hours. Working evenings and weekends is all part of my work as I fit around YOU , so if its better to chat at 9 p.m. on a Sunday , we can! So just email or call (any voice messages are emailed straight to me if I cannot take the call personally)

Regards

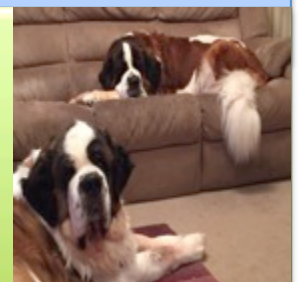

*John*

## Pets ?

**Don't  
want to  
leave  
them at  
home?**

We have access to hundred of properties across the UK where pets are allowed! So if you want a break. but don't want kennels or the worry of family and friends looking after the animals? We have the answer.....The rules may not allow animals on the furniture while away but our St Bernards are at home on this picture and try getting a 12 stone dog off a sofa when it does not want to.....

## Why use a travel agent ?

More and more people are booking their holidays on line and adding a flight here, hotel there and car hire as well, or even a transfer. That's all great as long as you have all the information right, you do not have any changes and there are no hiccups

But what if there are who do you turn to? Will the faceless website you booked with have a telephone that's answered? Will someone be able to assist with changes. How do you get peace of mind and full protection. Answer, us a travel agent

You should have everything covered under ATOL protection and that is where a lot of self bookings come unstuck. Its fine saving a few pounds (and often you do not) doing it yourself but are you sure you have protection if the airline stops flying, the hotel has issues etc.

Unless its a package I would never recommend anyone flies out to join a cruise ship the same day as sailing as if your flights late your ship will not wait. On a package you have full peace of mind , its not your worry but booking it yourself it is . So go out a day or two early, you deserve it !
